TYPHUS																																																																																																															
The following cases of typhus were reported during the week.																																																																																																															

NEW DELHI, 3 (INDIA);  
The 1st August, 1949.

S. P. JAIN,  
for Registrar General, India.

# NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 9th July 1949.

Explanation of symbols used:—

B.—Births; B. R.—Birth rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D. D.—Dysentery & Diarrhoea; R. D.—Respiratory diseases; D. R.—Death rate.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 9th July 1949 relate to 178 towns with an estimated population of 22,936 thousands. The total number of towns is 213 and their population is 25,943 thousands. Thus 84% of the total number of towns representing 89% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 13,070 and 8,410 representing birth and death rates of 29.6 and 19.1 per thousand of the population respectively.

(A) *Indian Provinces.*—The data here relate to 159 towns with an estimated population of 20,806 thousands. The total number of towns is 189 and their population is 23,320 thousands. Thus 84% of the total number of towns representing 88% of the total population is covered. The number of births and deaths recorded in these towns were 12,067 and 7,870 representing birth and death rates of 30.2 and 19.7 per

thousand of the population respectively. The table at the end gives the position by provinces. Malagaon in Bombay was the only town which had a high death rate of 78.0 per thousand of the population and this high death rate was mainly due to deaths from cholera, dysentery and diarrhoea and fevers.

(B) *Unions and States.*—The data here relate to 19 towns with an estimated population of 2,130 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 79% of the total number of towns representing 81% of the total population is covered. The number of births and deaths recorded in these towns were 1,003 and 540 representing birth and death rates of 24.5 and 13.2 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of the population.
